**Reason for revisions**

The Company's basic policy for returning profits to shareholders is to maintain and increase stable dividends while strengthening its financial position and corporate infrastructure. In the new mid-term plan, "Morita Growth 2030," announced on June 22, 2026, the Company set forth a dividend policy that targets a "DOE (dividend on equity) of around 3.5% or higher" as a shareholder return policy.

Based on these policies, the Company has decided to increase the interim and year-end dividend forecasts for the fiscal year ending March 31, 2027 by 8 yen per share each, and to revise the annual dividend forecast to 80 yen per share, an increase of 16 yen from the previous forecast.

(Note) The above forecast is based on information available as of the date of this document's release. Actual dividends may differ from the forecast figures due to various factors in the future.
